

Tableau Dashboard (Day -7)

By: L Vinay Rajiv Reddy

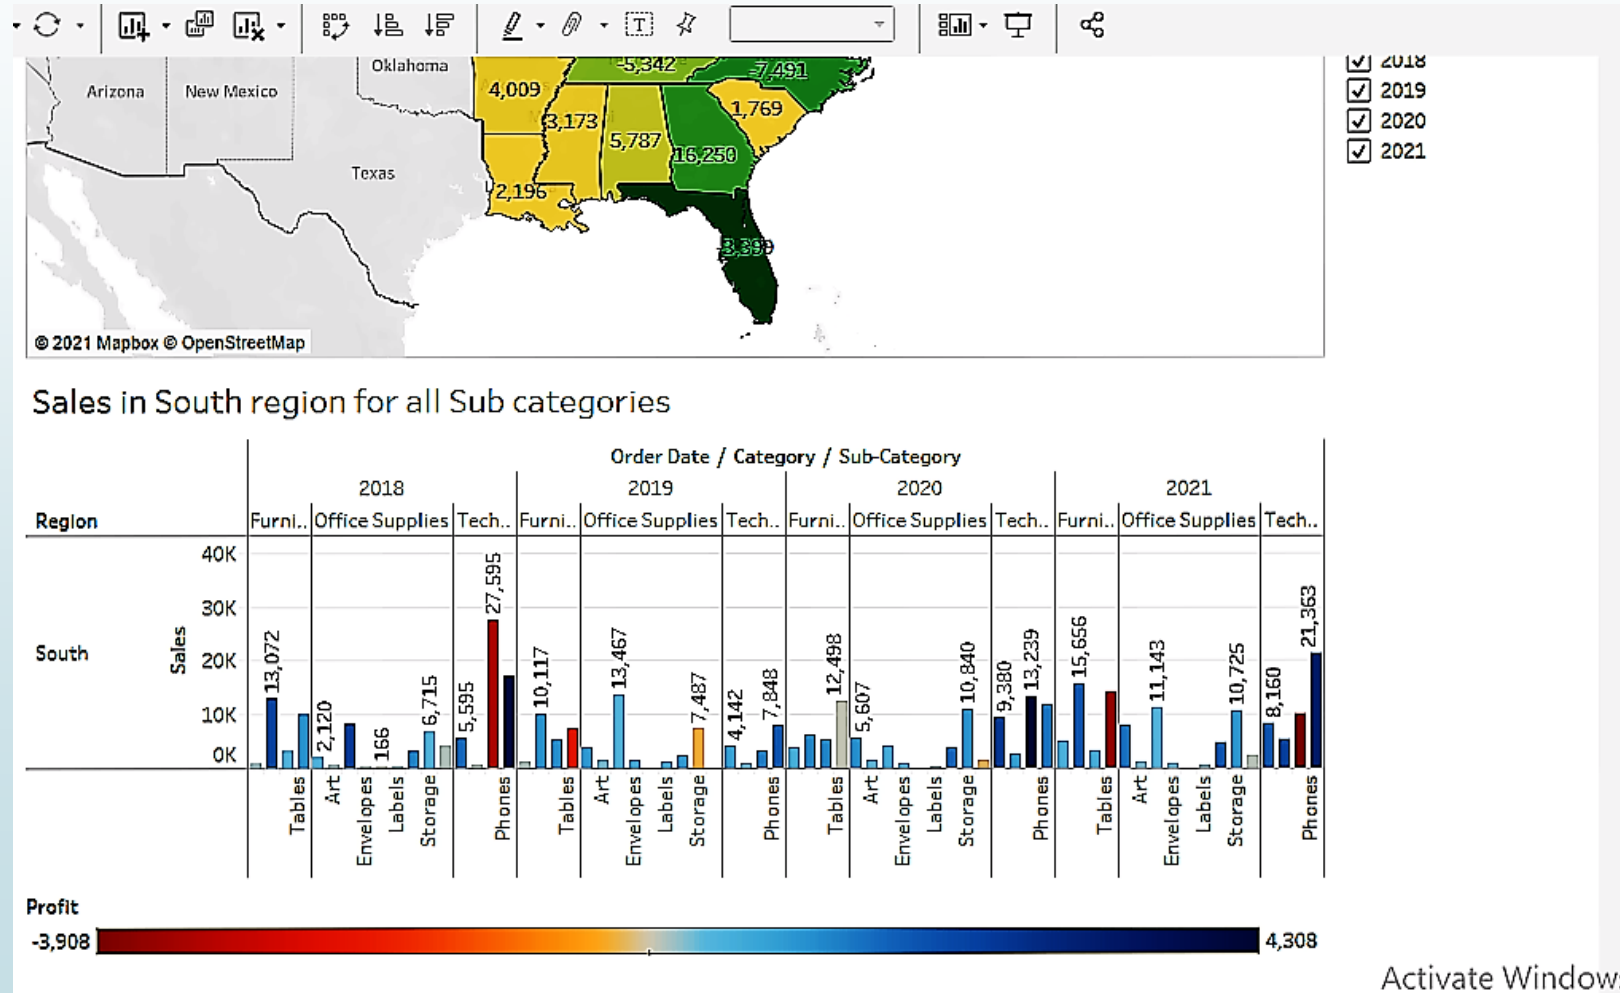

1,2) Build a dashboard using Profit Map and Sales in South worksheet and arrange them to find some insights

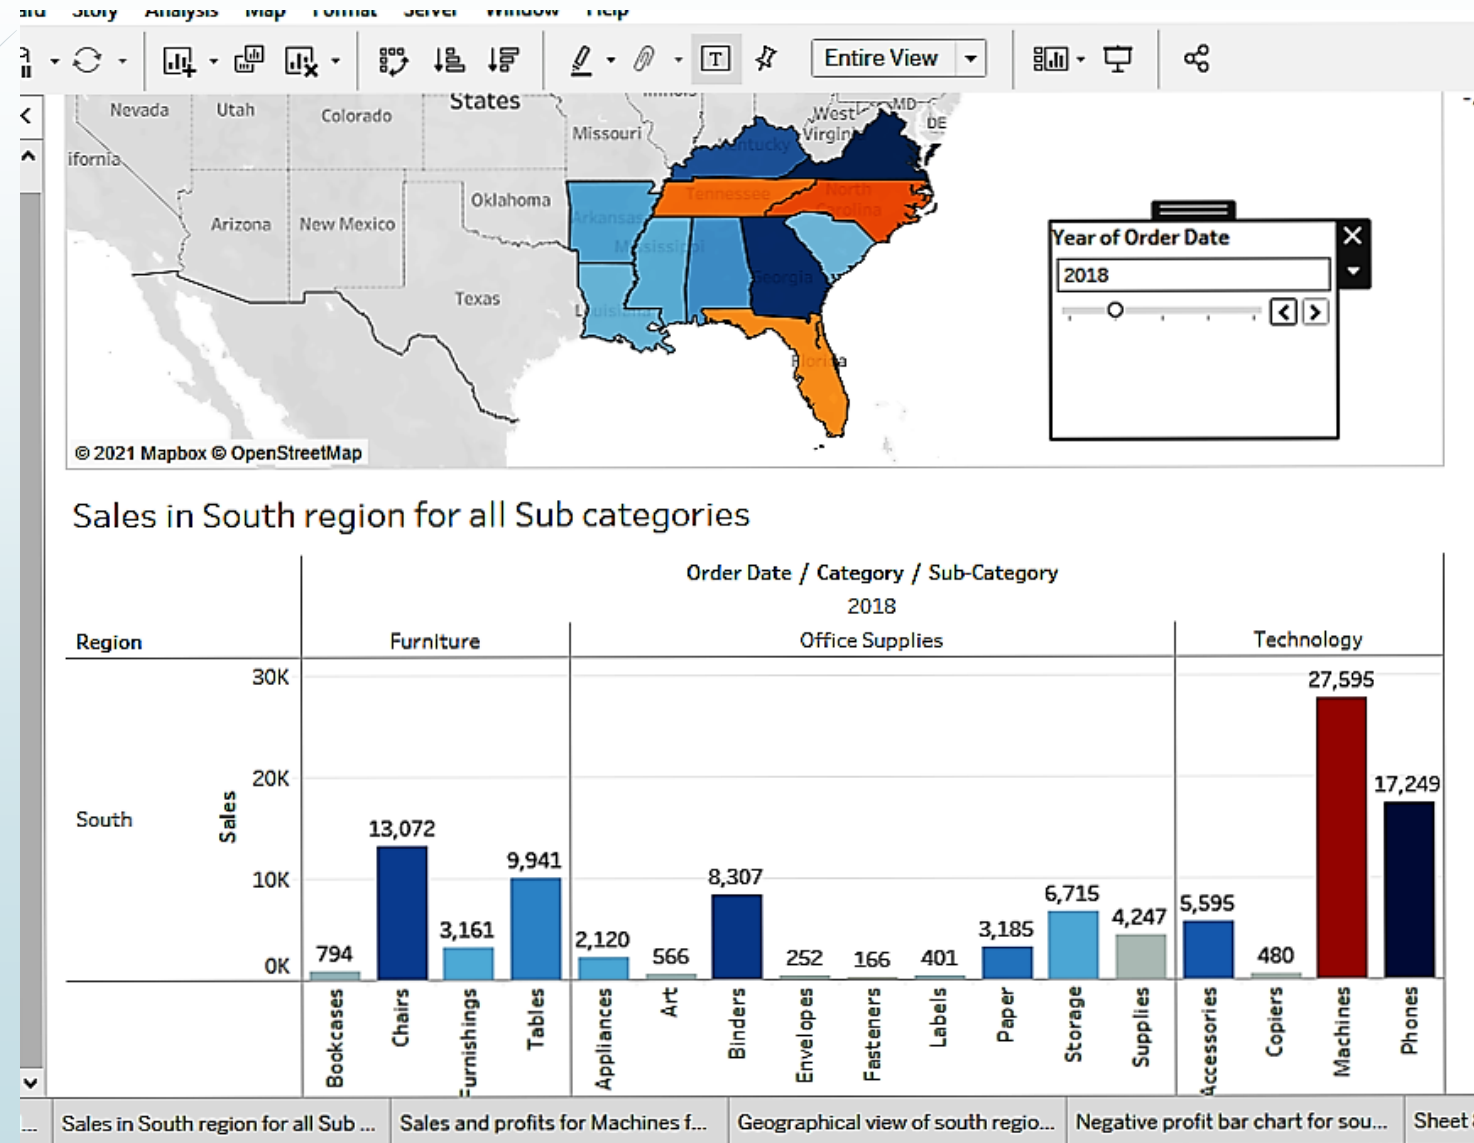

3) Remove all the sub category filter except year of order to vacate the space

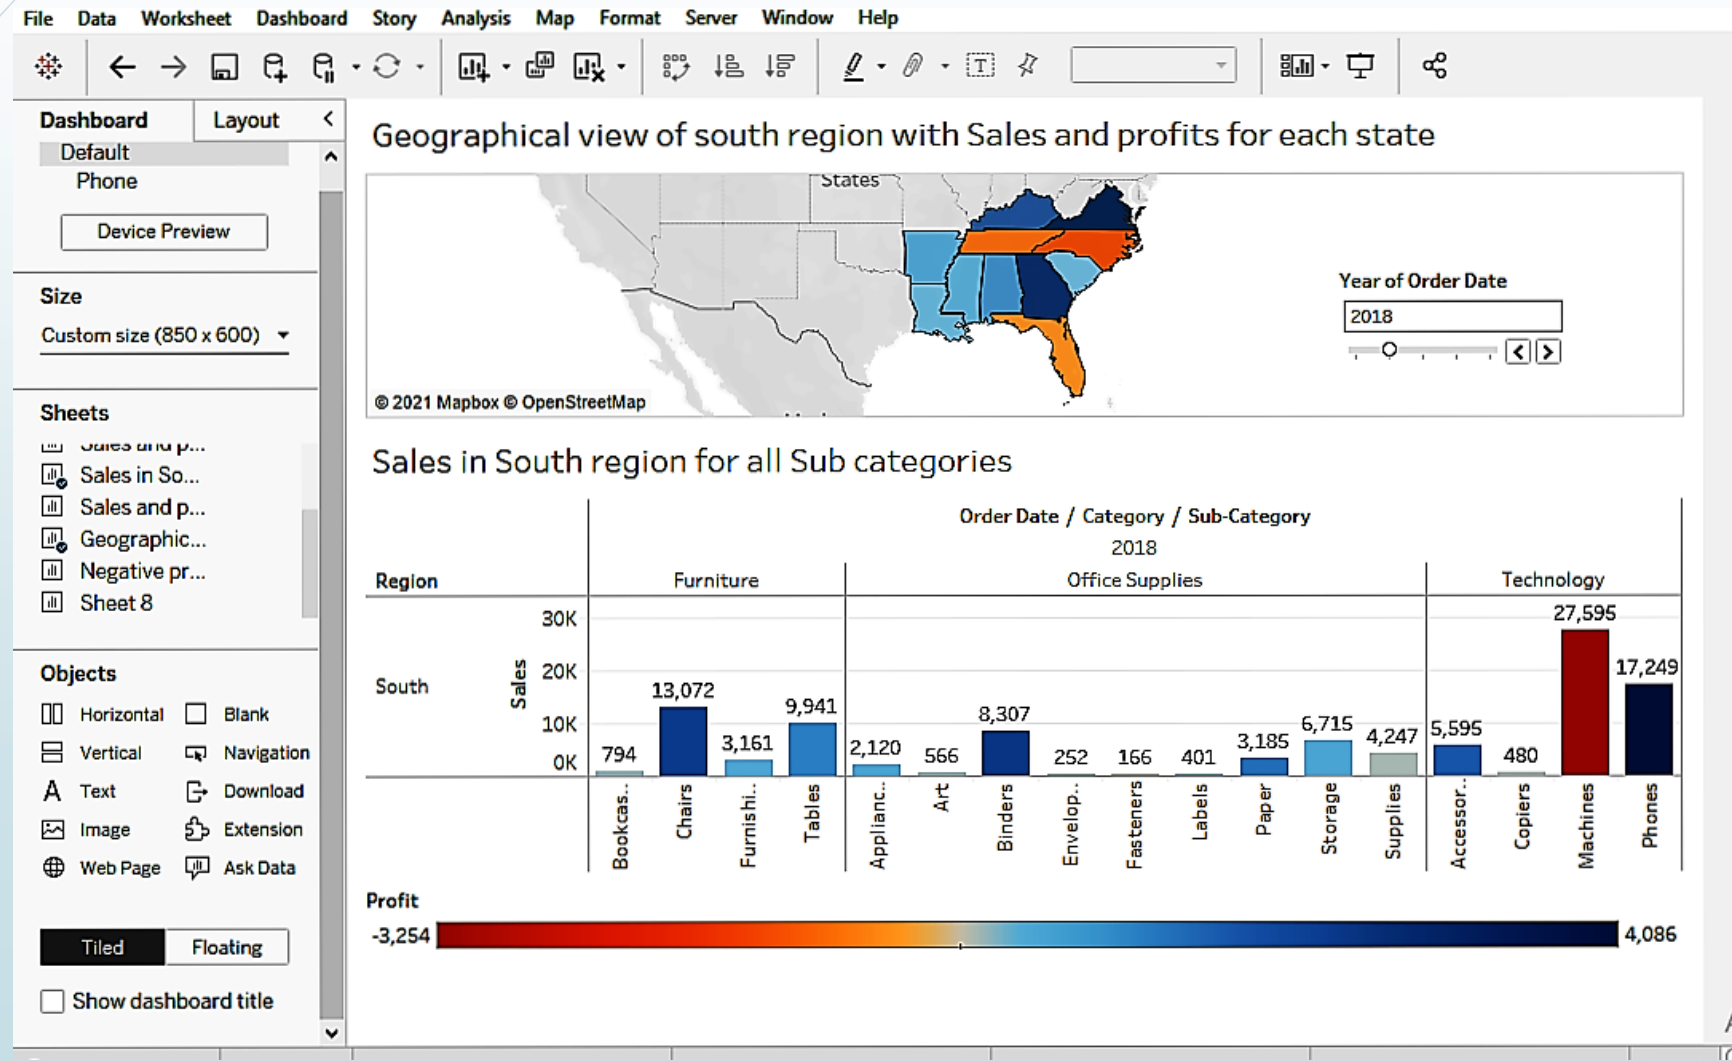

4) Select Profit color legend and drag it to Sales in the South.

5) Create a slider for Order of Date filter

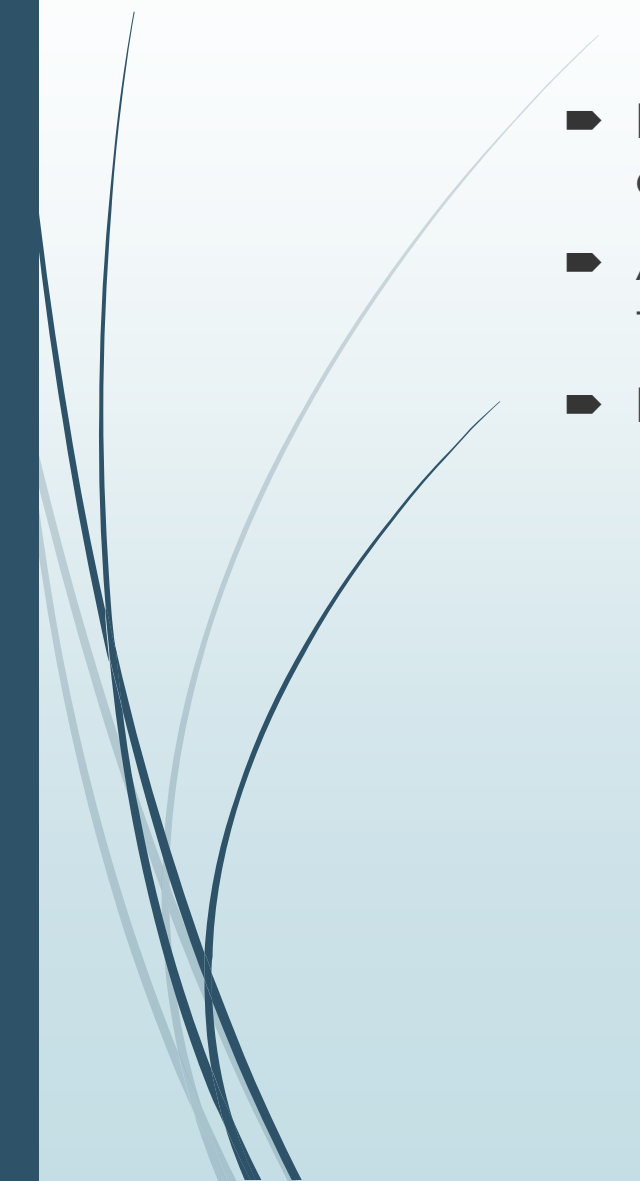

6) Resize your dashboard to best fit

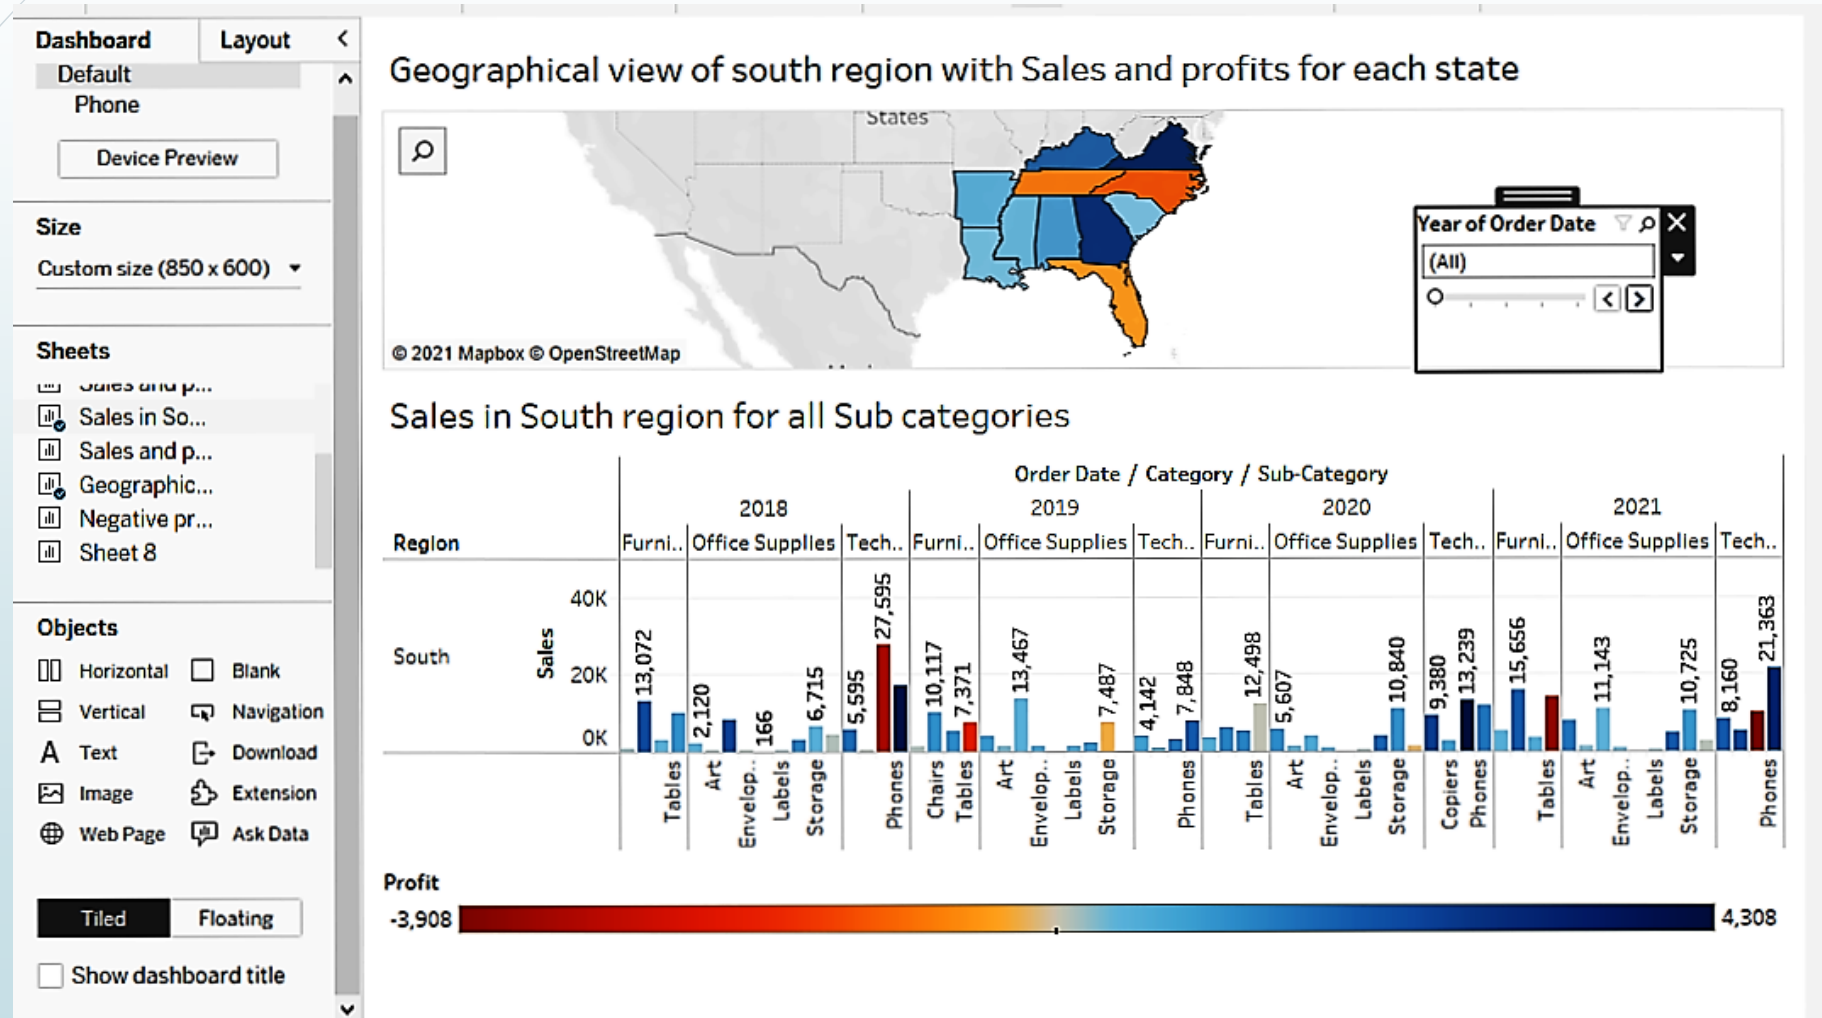

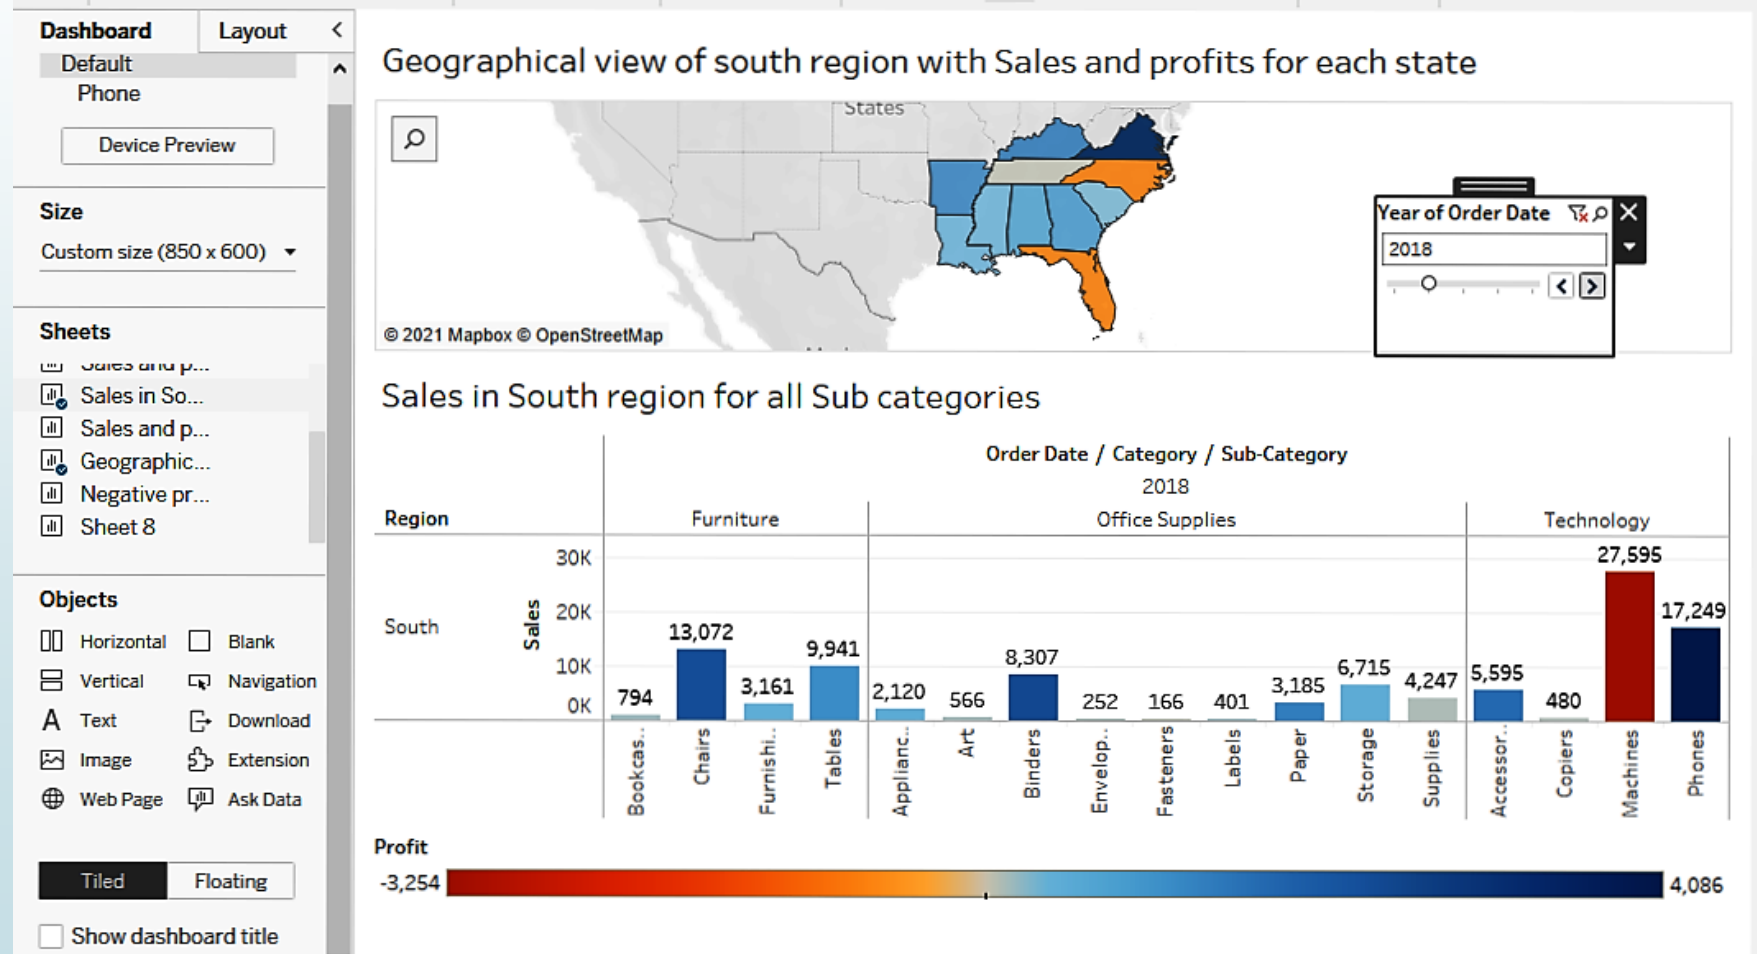

7, 8) Make your Dashboard *Interactive*

- Here we made dashboard interactive in such a way that, as the year changes in slider, the profit and sales in the below graph also varies.
 - Additionally the color legend on the map also varies in accordance with the values.
 - Let us see for some random years in next slides.
- 

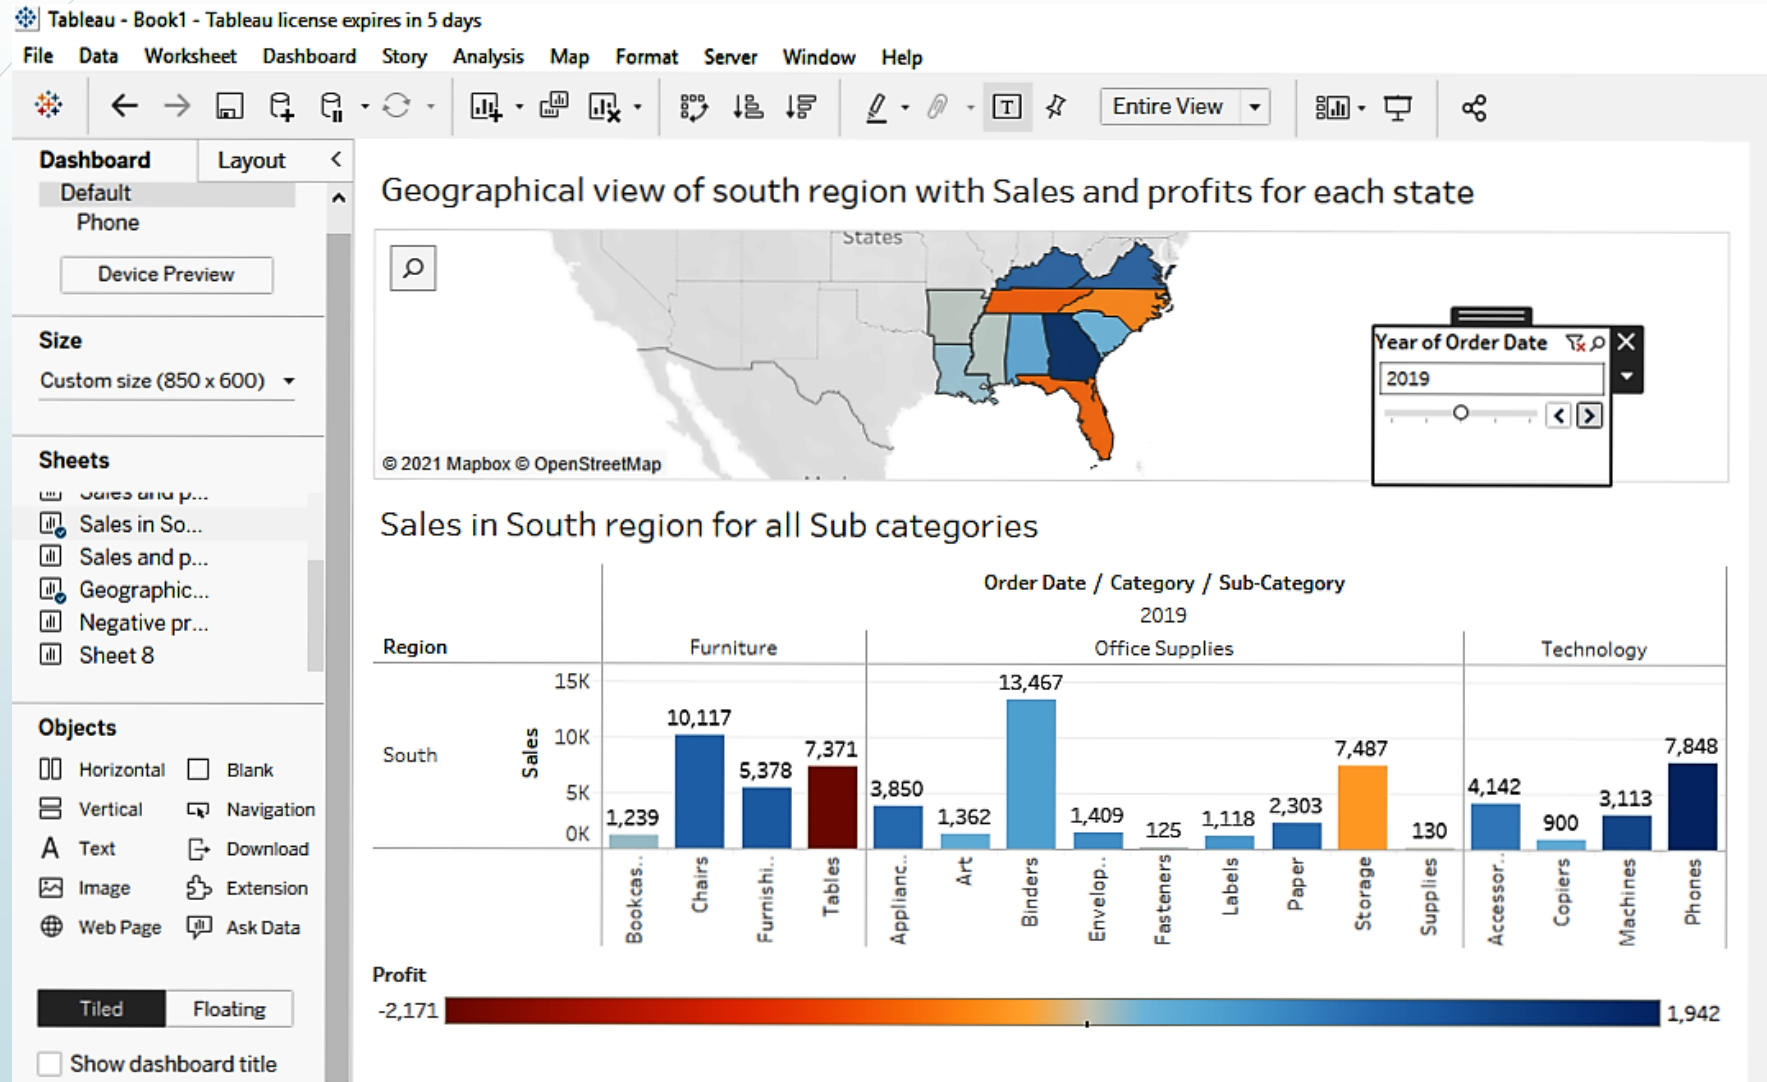

Profit & sales for All the years

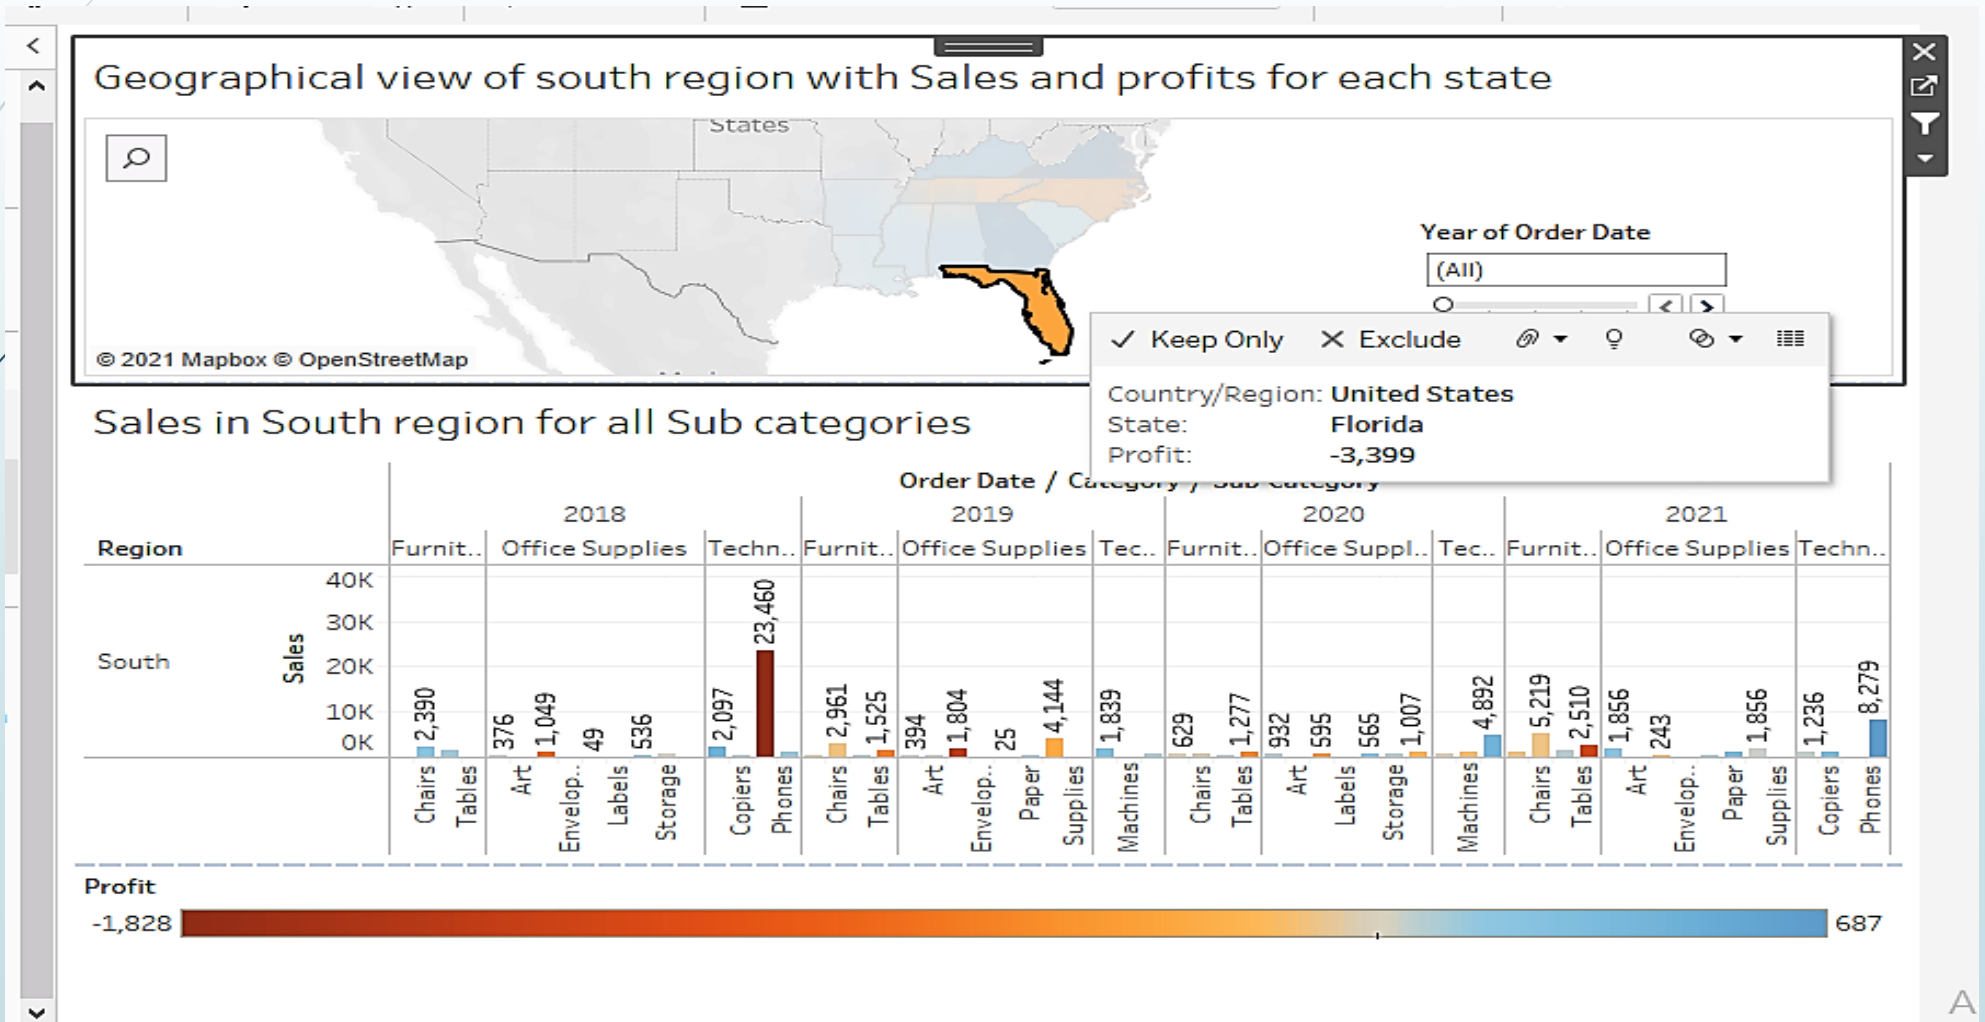

Profit & Sales for 2018

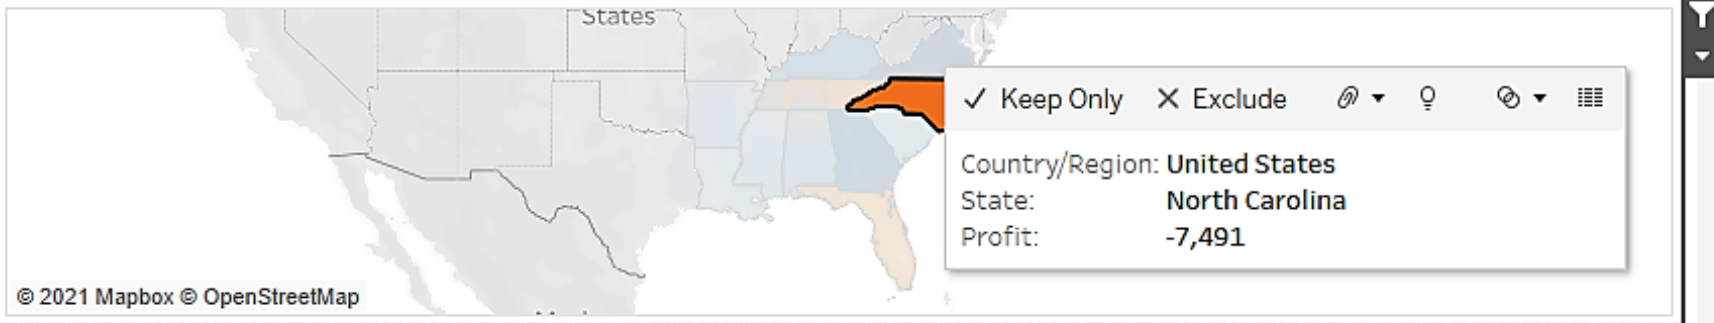

Profit & Sales for 2019

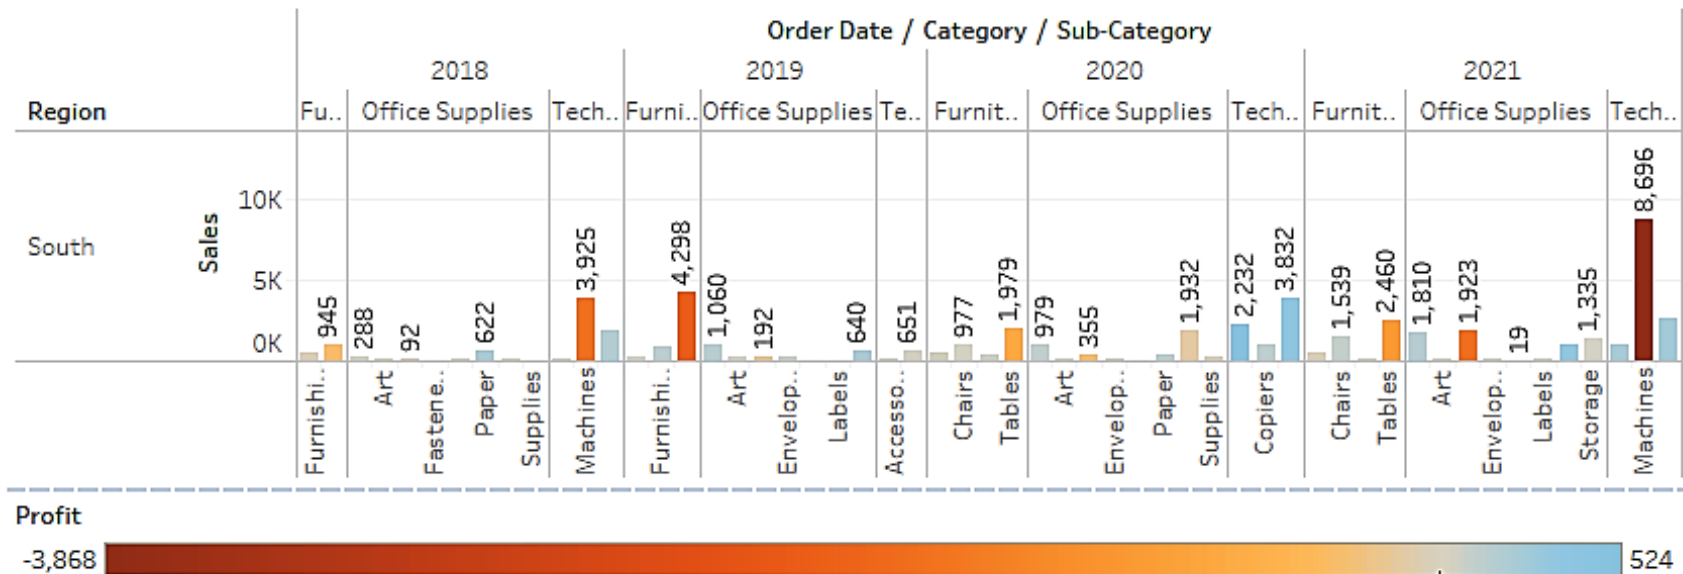

9) Click each states in the profit map having negative profit and check both profit and sales for each state

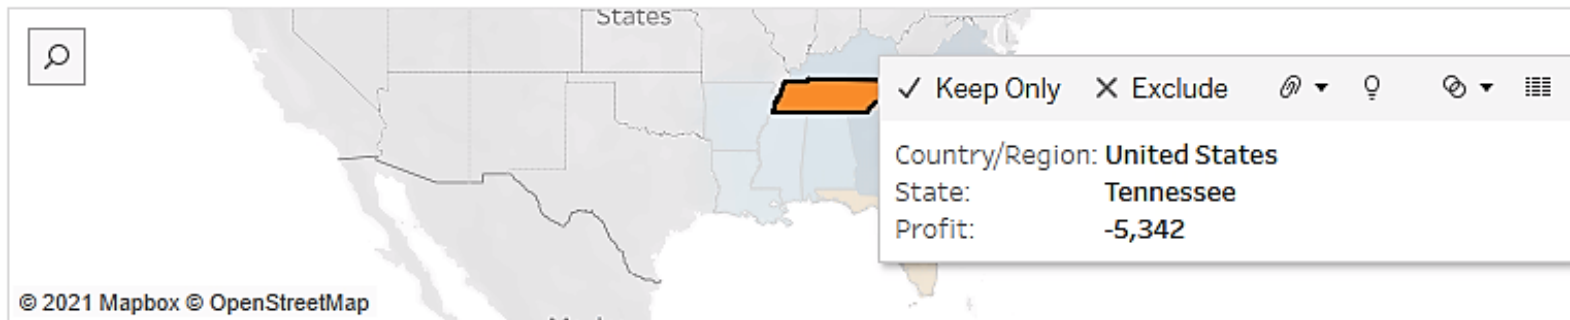

Geographical view of south region with Sales and profits for each state

Sales in South region for all Sub categories

Geographical view of south region with Sales and profits for each state

Sales in South region for all Sub categories
